Automatic pH and ORP regulator
Pool automation My Ozonex essentiel

As My ozonex responds perfectly to the demand of the professionals who receive it from the public, Ozonex has developed a new connected pH/ORP controller for private individuals; My Ozonex essentiel.

This version is suitable for family pools. It is simple and intuitive to use thanks to its integrated, highly functional 7-inch touch screen that gives instant access to the entire installation. It provides direct access to all possible information about the pool or spa and makes it easy to determine the type of function and the desired options for each application :

Examples of the possibilities of My Ozonex essenciel :

- filtration pump (4 programmable time slots)
- filter (optional with probe)
- 1 amperometric probe for free/active chlorine calculation
- automatic pH+/pH-/REDOX/anti-algae controller
- heating (PAC, heater) or lighting
- programmable out-of-gel (avoids winter)
- overchlorination also programmable
- sensors (temperature, pressure...)
- consumption of products (day/week/month)

You will also benefit from remote monitoring of your pool by a qualified Ozonex technician from 9h to 18h which provides additional security for the consumer.

The set includes

automatic pH/ORP regulator
(My Ozonex essentiel)

wall bracket 800 x 800

probe holder
(pH / ORP / temperature sensor
and amperometric in option)

ozonator (optional), will give you quality bacteriological unrivalled comfort and bathing worthy of spring water.
Its oxidising power is 50 times more powerful than that of chlorine.

electromechanical dosing pumps
(flow rate according to pool volume)

PROBES AND SENSORS

- ✓ water temperature
- ✓ pH
- ✓ redox
- ✓ filter pressure
- ✓ amperometric probe 1
  (calculation of free/active chlorine)

QUICK ACCESS

synoptic

menu

home

AUTOMATIC EQUIPMENT MANAGEMENT

- ✓ filtration pump
- ✓ heating (PAC, heater, solar)
  (if lighting is not used)
- ✓ filter pressure (installation of a sensor)
- ✓ sensors
- ✓ pool lighting
  (if heating is not used)

AUTOMATIC REGULATORS

- ✓ pH-
- ✓ pH+
- ✓ ORP (REDOX)
- ✓ anti-algae (or timed flocculant)

THE INTEGRATED PARAMETERS

- 7-inch touch screen with synoptic view
  (view showing the entire installation)
- possible overbreathing
- out of frost (avoid winter)
- product consumption (day, week, month)
- level of the products in the containers
  (with low level alarm)
- time slots for automation
- calibration of the different sensors
- clock
- 100% French manufacturing
- app for smartphone, tablet and PC
- Ozonex surveillance for remote management
  (additional security for the consumer)
